

# HD Progressive 1.3

Tensioned Projection Surface - high resolution

HD PROGRESSIVE

**Standard:**  
UL 2818 - 2013 Standard for Chemical Emissions for Building Materials, Finishes and Furnishings

**Certification number:**  
Greenguard Gold - 42729-420

## FRONT PROJECTION

### Feature:

High resolution projection - reflective

### Application:

Engineered for high resolution projection where color fidelity, image uniformity and pixel preservation are vital. HD Progressive is the best surface for HD, 4K and Ultra HD projection.

Ideal for applications where projector brightness and screen size require an increase in gain, the purest white HD Progressive surface offers true color reproduction, and allows for more flexibility with ambient light conditions. It also allows for easy viewing of detail in video as well as charts and graphs in a corporate setting. Seamless in any width up to 488 cm in height.

### Screen fabric specifications:

Gain	1.3	GreenGuard certification	yes
Viewing Angle	150°	Ambient light resistance	good performance
Application	front projection	Coating	front
Base material	vinyl	Coating type	reflective
Fire retardancy	B2 DIN4102-1 M2 NFP 92-503	Thickness	~0.65 mm
Black backing:	yes	Weight	~950 g/m <sup>2</sup>
Edge Blending properties	excellent	Ability to seam	good
Opacity rating	> 99%	Tear strength	good
Size limitations	488 cm high × any width	Foldable	no
Seamless	up to a height of 488 cm	Cleanable	yes
		Screen type	DIN 19045-4 - D (Diffuse)
