

RoboSHOT IW

In-Wall HDBT Recessed HD System

The Industry's First Smart Glass PTZ Camera

Completely enclosed within its mounting case, the RoboSHOT® IW (In-Wall) HDBT Recessed HD Camera is ideal for capturing conversations or video conferencing in room settings where elegant interior design, cleanliness, or even theft deterrence is desired.

The RoboSHOT IW semi-flush-mounted camera system is enclosed behind glass – providing robust protection for high traffic areas, classrooms or multipurpose rooms where cameras might be subject to tampering during nonuse.

With the optional smart glass RoboSHOT IW model, the glass cover changes from a frosted opaque when the camera is off to a transparent clear glass when the camera is powered on. When it's off, the opaque glass hides the PTZ camera – out of sight, out of mind – perfect for corporate board rooms, law offices, courtrooms, medical institutions or any application where clearly knowing a camera's active status is vital.

RoboSHOT IW is the ultimate professional PTZ camera solution for the design-conscious customer, yet maintains Vaddio's high standards for performance, network manageability and ease of use.

RoboSHOT IW. Available in smart glass or clear glass models.

Superior Image Quality. Recessed and Out of the Way.

One cable means easier installations

Equipped with Vaddio's popular OneLINK™ HDBaseT® port, the RoboSHOT IW easily connects to Vaddio OneLINK extension systems or other HDBaseT-compatible devices to reduce cabling and extend video, power, and control up to an installation distance of 328 ft (100 m).

Features

- **Beautiful, fully enclosed design** – Can be the design spotlight of the conference room or the practical solution to protect the camera in high traffic areas
- **Provides privacy** – Put room attendees at ease with clear indication of active camera status
- **ADA compliant** – Semi-flush-mounted, making it compliant with the Americans With Disabilities Act (ADA)
- **HD 1080p video quality, 10x optical zoom, 73° FOV and 16 configurable camera presets**
- **Flexible output options** – For example, pass uncompressed, high resolution video over USB by pairing with the OneLINK Bridge AV Interface. Capable of 1080p/60fps for the smoothest video available. Also supports USB 2.0.
- **Telnet or IP remote management** – Easy, intuitive web-based user interface for remote configuration, management and control
- **Color adjustment** – Automatically or manually adjust image color, shading, backlight, and wide dynamic range to optimize color in different settings
