## TABLE OF CONTENTS

(3) Advantage ${ }^{\ominus}$ (With Closure Door)

5 Advantage
Previously Named: Advantage Electrol

7 Advantage with SightLine ${ }^{T m}$

9 Advantage (Over 14' W with Closure Door)
Previously Named: Large Advantage Deluxe Electrol

11 Advantage (Over 16' W)
Previously Named: Large Advantage Electrol

## DA-LITE A brand of 'tilegrand'

## Advantage (With Closure Door)

Previously Named: Advantage Deluxe Electrol

SUGGESTED SPECIFICATIONS: $\qquad$ projection screen(s),
$\qquad$ (H) x $\qquad$ (W). The Advantage ${ }^{\odot}$ (With Closure Door) shall have two motors, one to operate door and one to operate screen. Door motor electrically operated 120 volt ( 60 Hz ) not more than 1.2 amp , mounted inside the roller, to be three wire with ground, quick reversal type, oiled for life, with automatic thermal overload cutout, integral gears, capacitor and an electric brake to prevent coasting. To have pre-set but adjustable limit switches to automatically stop fabric door in the "down" position. The door will lift to the closed position where a micro switch shall cut off the electrical current to the door motor. Screen motor is electrically operated 120 volt ( 60 Hz ) not more than 2.4 amp , mounted inside the roller, to be three wire with ground quick reversal type, oiled for life, with automatic thermal overload cutout, integral gears, capacitor and an electric brake to prevent coasting. To have pre-set but adjustable limit switches to automatically stop picture surface in the "up" and "down" positions. The roller to be of rigid metal. Screen fabric to be flame retardant and mildew resistant fiberglass with black masking borders standard. Bottom of fabric shall be formed into a pocket holding a metal rod with plastic caps. Case shall be a white powder coated aluminum extrusion. Bottom of case to be self-trimming with a built-
in flange around the bottom of the case.
A section of the bottom of the case shall be an aluminum door equipped with concealed hinges so that it opens and closes automatically with the lowering and raising of the picture surface. The balance of the bottom of the case shall be a second hinged aluminum door with manual opening to provide access. Junction box shall be internally integrated into the housing making it possible to install the housing and wire to the building's electrical system during construction. The junction box shall contain a quick connector that is mounted in the housing for easy plug-in connection to the motorized fabric and roller assembly. The motorized fabric and roller assembly to be installed in the case at the factory or at a later time at the job site. To be complete with integrated low voltage control unit and three position control switch with cover plate. Suitable for use in environmental air space in accordance with section 300-22 (c) of the National Electric Code, and sections 2-128, 12-010 (3) and 12-100 of the Canadian Electrical Code, part 1, CSA C22.1. Screen to be listed by Underwriters' Laboratories.

## Advantage

Previously Named: Advantage Electrol

SUGGESTED SPECIFICATIONS: $\qquad$ projection screen(s),
$\qquad$ (H) $\times$ $\qquad$ (W), electrically operated 120 volt ( 60 Hz ), not more than 2.4 amp with a quick connect male plug-in connector on the motor. Shall have specially designed motor mounted inside the roller, to be three wire with ground, quick reversal type, oiled for life, with automatic thermal overload cutout, integral gears, capacitor and an electric brake to prevent coasting. To have preset but adjustable limit switches to automatically stop picture surface in the "up" and "down" positions. Junction box shall be externally integrated into the housing making it possible to install the housing and wire to the building's electrical system during construction. The junction box shall contain a quick connector that is mounted in the housing for easy plug-in connection to the motorized fabric and roller assembly. The roller to be of rigid metal. The motorized fabric and roller assembly to be installed in the case at the factory or at a later time at the job site. Roller mounting brackets to be adjustable to allow centering or
offsetting of the screen within the case. Screen fabric to be flame retardant and mildew resistant fiberglass with black masking borders standard. Bottom of fabric shall be formed into a pocket holding a metal rod. Heavy duty plastic caps shall protect the ends of the rod. Top, front and back of case to be made of extruded aluminum powder coated white. End caps to be of heavy gauge steel, powder coated white. Bottom of case to have a removable access door. Door to be of extruded aluminum powder coated white. Bottom of case to be self-trimming, with a built-in flange around the bottom of the case. To be complete with integrated low voltage control unit and three position control switch and cover plate. Suitable for use in environmental air space in accordance with section 300-22 (c) of the National Electric Code, and sections 2-128, 12-010 (3) and 12-100 of the Canadian Electrical Code, part 1, CSA C22.1. Screen to be listed by Underwriters' Laboratories.

## PRODUCT NOTES

- Overall case length dimensions $+/-1 / 4^{\prime \prime}(0.6 \mathrm{~cm})$.
- Detail dimensional drawings, wiring diagrams and installation instructions available upon request.
- Specifications subject to change without notice.
- Custom formats and sizes available upon request.
- Electrical junction box extends $21 / 8^{\prime \prime}(5.4 \mathrm{~cm})$ past case length on left end of case, $11 / 8^{\prime \prime}(2.9 \mathrm{~cm})$ past ceiling flange.
- Internal junction box available. Will add $3 ½^{\prime \prime}(8.9 \mathrm{~cm})$ to overall case length and must be specified at time of order, recommended for drywall installations.
- Junction box on top of case available. Will add $31 / 2^{\prime \prime}$ $(8.9 \mathrm{~cm})$ to overall case length and $17 / 8^{\prime \prime}(4.8 \mathrm{~cm})$ to height at left end of case; must be specified at time of order.

SURFACE INFORMATION
Matte White: Horizontal seam required when both dimensions exceed 10!
High Contrast Matte White: Available in sizes where both dimensions do not exceed 8.

WHEN ORDERING, MARK APPROPRIATE SELECTIONS

SUGGESTED SPECIFICATIONS: $\qquad$ projection screen(s),
$\qquad$ (H) x $\qquad$ (W), electrically operated 120 volt ( 60 Hz ), not more than 2.4 amp with a quick connect male plug-in connector on the motor. Shall have specially designed motor mounted inside the roller, to be three wire with ground, quick reversal type, oiled for life, with automatic thermal overload cutout, integral gears, capacitor and an electric brake to prevent coasting. To have preset but adjustable limit switches to automatically stop picture surface in the "up" and "down" positions. Junction box shall be externally integrated into the housing making it possible to install the housing and wire to the building's electrical system during construction. The junction box shall contain a quick connector that is mounted in the housing for easy plug-in connection to the motorized fabric and roller assembly. The roller to be of rigid metal. Roller designed to drop material from case on $1 \mathrm{~mm} 7 / 19$ galvanized aircraft cable ( 70 " maximum). The motorized fabric and roller assembly to be installed in the case at the
factory or at a later time at the job site. Roller mounting brackets to be adjustable to allow centering or offsetting of the screen within the case. Screen fabric to be flame retardant and mildew resistant fiberglass with black masking borders standard. Bottom of fabric shall be formed into a pocket holding a metal rod. Heavy duty plastic caps shall protect the ends of the rod. Top, front and back of case to be made of extruded aluminum powder coated white. End caps to be of heavy gauge steel, powder coated white. Bottom of case to have a removable access door. Door to be of extruded aluminum powder coated white. Bottom of case to be selftrimming, with a built-in flange around the bottom of the case. To be complete with integrated low voltage control unit and three position control switch and cover plate. Suitable for use in environmental air space in accordance with section 300-22 (c) of the National Electric Code, and sections 2-128, 12-010 (3) and 12-100 of the Canadian Electrical Code, part 1, CSA C22.1. Screen to be listed by Underwriters' Laboratories.

## PRODUCT NOTES

- All screens standard with 70 " of fully adjustable cable drop. Drop set to 24 " at the factory and adjusted to desired distance during installation.
- Screens with a case length of 120 " or under drop from 3 cables. Screens with a case length over 120" drop from 4 cables.
- Overall case length dimensions $+/-1 / 4^{\prime \prime}(0.6 \mathrm{~cm})$.
- Detail dimensional drawings, wiring diagrams and installation instructions available upon request.
- Specifications subject to change without notice.
- Custom formats and sizes available upon request.
- Electrical junction box extends $21 / 8^{\prime \prime}(5.4 \mathrm{~cm})$ past case length on left end of case, $11 / 8^{\prime \prime}(2.9 \mathrm{~cm})$ past ceiling flange.
- Internal junction box available. Will add $3 ½$ " ( 8.9 cm ) to overall case length and must be specified at time of order, recommended for drywall installations.
- Junction box on top of case available. Will add $31 / 2^{\prime \prime}$ $(8.9 \mathrm{~cm})$ to overall case length and $17 / 8^{\prime \prime}(4.8 \mathrm{~cm})$ to height at left end of case; must be specified at time of order.

## SURFACE INFORMATION

Matte White: Seamless in all standard sizes
High Contrast Matte White: Available in sizes where both dimensions do not exceed 8.

# Advantage (Over 14' W with Closure Door) <br> Previously Named: Large Advantage Deluxe Electrol 

SUGGESTED SPECIFICATIONS: $\qquad$ projection screen(s),
$\qquad$ (H) $\times$ $\qquad$ (W). The Advantage ${ }^{\oplus}$ (Over 14' W with Closure Door) shall have two motors, one to operate door and one to operate screen. Door motor electrically operated 120 volt ( 60 Hz ) not more than 1.2 amp , mounted inside the roller, to be three wire with ground, quick reversal type, oiled for life, with automatic thermal overload cutout, integral gears, capacitor and an electric brake to prevent coasting. To have pre-set but adjustable limit switches to automatically stop fabric door in the open position. The roller to be of $1.6^{\prime \prime}$ diameter aluminum. Screen motor is electrically operated 120 volt ( 60 Hz ) not more than 2.4 amp , mounted inside the roller, to be three wire with ground quick reversal type, oiled for life, with automatic thermal overload cutout, integral gears, capacitor and an electric brake to prevent coasting. To have pre-set but adjustable limit switches to automatically stop picture surface in the "up" and "down" positions. Rigid metal roller, to be at least $53 / 4$ " in diameter (on screens $14^{\prime}$ to $18^{\prime}$ wide) or 7 " in diameter (on screens where either height or width equal or exceed $20^{\prime}$ ). Screen fabric to be flame retardant and mildew resistant fiberglass with black masking borders standard. Bottom of fabric shall be formed into a pocket holding a metal rod with plastic caps. Case shall be a white powder
coated aluminum extrusion. Bottom of case to be self-trimming with a builtin flange around the bottom of the case. A section of the bottom of the case shall be a retractable aluminum door that opens and closes automatically with the lowering and raising of the picture surface. The balance of the bottom of the case shall be a second aluminum door with manual opening to provide access. Junction box shall be internally integrated into the housing making it possible to install the housing and wire to the building's electrical system during construction. The junction box shall contain a quick connector that is mounted in the housing for easy plug-in connection to the motorized fabric and roller assembly. The motorized fabric and roller assembly to be installed in the case at the factory or at a later time at the job site. To be complete with integrated low voltage control unit and three position control switch with cover plate. Suitable for use in environmental air space in accordance with section 300-22 (c) of the National Electric Code, and sections 2-128, 12-010 (3) and 12-100 of the Canadian Electrical Code, part 1, CSA C22.1. Screen to be listed by Underwriters' Laboratories.

## Advantage (Over 16' W) <br> Previously Named: Large Advantage Electrol

SUGGESTED SPECIFICATIONS: $\qquad$ projection screen(s),
$\qquad$ (H) $\times$ $\qquad$ (W), electrically operated 120 volt ( 60 Hz ), not more than 2.4 amp with a quick connect male plug-in connector on the motor. Shall have specially designed motor mounted inside the roller, to be three wire with ground, quick reversal type, oiled for life, with automatic thermal overload cutout, integral gears, capacitor and an electric brake to prevent coasting. To have preset but adjustable limit switches to automatically stop picture surface in the "up" and "down" positions. Junction box shall be internally integrated into the housing making it possible to install the housing and wire to the building's electrical system during construction. The junction box shall contain a quick connector that is mounted in the housing for easy plug-in connection to the motorized fabric and roller assembly. Rigid metal roller, to be at least $53 / 4$ " in diameter (on screens $14^{\prime}$ to $18^{\prime}$ wide) or 7 " in diameter (on screens where either height or width equal or exceed 20 '). The motorized fabric and roller assembly to be
installed in the case at the factory or at a later time at the job site. Roller mounting brackets to be adjustable to allow centering or offsetting of the screen within the case. Screen fabric to be flame retardant and mildew resistant fiberglass with black masking borders standard. Bottom of fabric shall be formed into a pocket holding a metal rod. Heavy duty plastic caps shall protect the ends of the rod. Case to be made of extruded aluminum powder coated white. End caps to be of heavy gauge steel, powder coated white. Bottom of case to have a removable access door. Door to be of extruded aluminum powder coated white. Bottom of case to be selftrimming, with a built-in flange around the bottom of the case. To be complete with integrated low voltage control unit and three position control switch with cover plate. Suitable for use in environmental air space in accordance with section 300-22 (c) of the National Electric Code, and sections 2-128, 12-010 (3) and 12-100 of the Canadian Electrical Code, part 1, CSA C22.1. Screen to be listed by Underwriters' Laboratories.
