

Rear Projection Module (RPM)

The Rear Projection Module (RPM) is designed to reduce the overall depth needed behind the screen for rear projection. It can be ordered with a single or double mirror package, and is custom engineered to meet the requirements of digital projection.

Features

- Precision-made, aluminum extrusion
- Perfect mirror adjustment system on models 42" X 60" and smaller

Product images

Frame constructed of square aluminum extrusion for durability and precision.

True flat trapezoid shaped mirror features a three point suspension system, which ensures superior stability and flatness.

The Perfect Image mirror adjustment system allows for precise image adjustment to correct barrel distortion and pin cushioning.
